

# Rule Based Outer Space Security Governance

**KNDA, YOO JoonKoo**

\* Presented at the 14th Jeju Forum for Peace and Prosperity, Jeju, South Korea, May 29-31, 2019, [http://www.jejuforum.or.kr/m21\\_program.php?year=2019](http://www.jejuforum.or.kr/m21_program.php?year=2019)

# Basic Questions

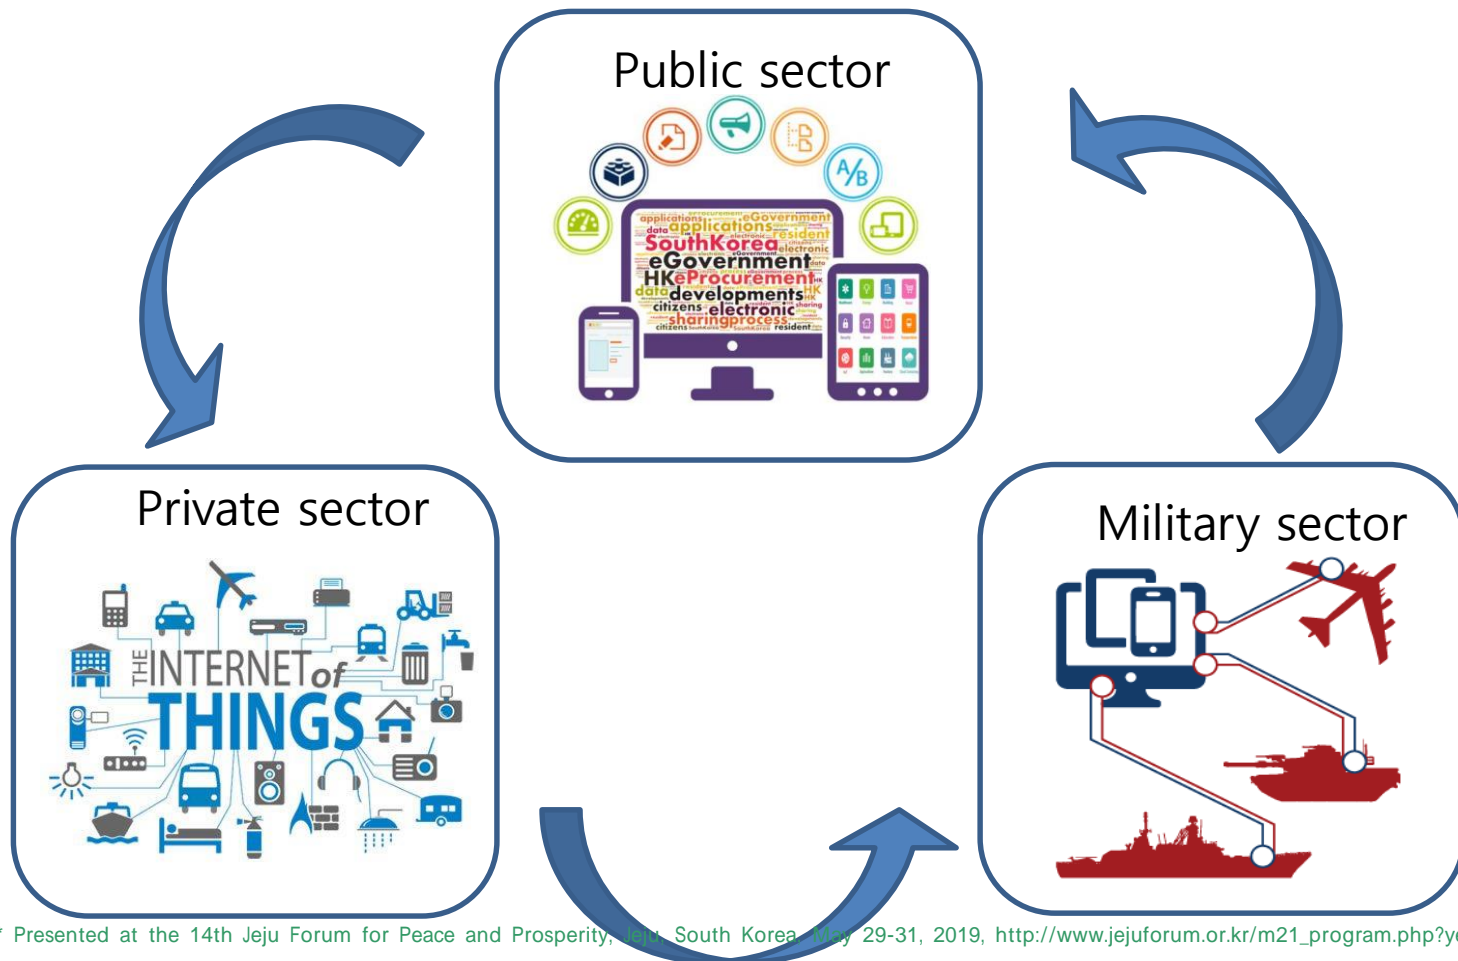

---

- How to manage interplay of P, E, and S?
- What are the differences from other domains?
- Universal international laws & norms apply in any meaningful way? (legitimacy v legality)
- How to set up the governance of outer space?
- How to promote international cooperation based on national interests?

# Space Security Environment Worldwide

## ● Increase in Space Threats and its effect

- Rapid Development of Space Infrastructure -> Economic Benefits
- Dependence on SI in Our Life -> Increase in Exposure to Space Threats

# Pending Issues of Space Operation

## ● Policy & Law : Interplay among politics, economy & Science & Technology

- 2 approaches, 4 baskets too many venues
- Hybrid nature of outer space
- State v. non-state actor
- Wide range of space based operation

 sovereignty, jurisdiction, state responsibility, counter measures & self defense, export control

# Global Commons?

## ● Space : linkage of the other domains

- Territorial sovereignty of space
  - International regulation of the use and exploitation the space resources
  - Coherent regulation of space control
  - Mutual desire to keep military utilization out
- ☞ Lacking consensus leads to my way fashion

# Complex Responses to Challenges

- **Multi-layer system: objects, persons and activities**
  - Convergence and Complex of possibilities
  - Non-governmental v. governmental
  - National v. regional v. global
  - Governmental v. multi-stake holder governance
- 👉 2 approaches, 4 baskets, too many venues

# Regulatory Framework of Policy and Law

## ● New Technologies and Military & Security

- Human Enhancement Technology
- Lethal Autonomous Weapons Systems(LAWS)
- Domain Weapons cf. Cyber & Space
- Multi-Domain Operation

☞ fragmented but mainstreaming

# Where is relevant int'l legal instruments?

## ● Two Blocks & Swing States

### Treaty Based System

- COPUOS: 6 treaties, 5 UNGA/R..
- ☞ shifting to bipolar to uni-multi polar, legitimate venue

### GGE Approach

- DC: PAROS GGE(TCBMs), 2013(15), 2018-19(25), cf. PPWT
- ☞ mechanism of future format, open-ended working group?

### Regional Initiative

- ICoC: TCBMs, Self Defense
- ☞ bridging b/w the US(like-minded) and Russia & China(BRICS)

### New trends Manual

- Woomera Manuel on the International Law of Military S operation
- MILAMOS Projects: Manuel on International Law Applicable to Military Uses of U of OS
- ☞ state practices for hegemony cf. UN Charter *in its entirety*

# Debates on Applicable International Laws

## ● Perception, Policy and Laws

- Outer space: global commons v. territory
- Space security: existing *jus in bello* & *jus ad bellum* v. new int'l law like disarmament
- Types of Regulation: comprehensive international law v. non-binding norms
- State control v. multi-stake holder governance

Lacking consensus, “My Way” fashion

# Space Warfare and Use of Force

## ● Multi Domain of Warfare

- Ambiguity: physical damage v. functional damage, cf. kinetic
- Effect of weapon v. Nature of weapon
- Right of self-defense: proportionality
- Space military strategy and market, cf. dual use

 Substance, Intention, Tool

# **“Armed Attack” under the *Jus ad Bellum***

## ● **The Gap b/w “armed attack” and use of force”**

- Nicaragua case: scale and effects
- Concept of “armed”
- “Physical consequences” standard
- Injury or damage test cf. intent v. conduct
- ☞ Lawful countermeasures and self defense  
cf. PSD of CSD

# Basic Elements

## ● Context, Purpose and Mean/Tool

- Context: space warfare act by the use of technological information systems with the purpose of strategic, operative and/or tactical advantage
- Purpose: causing, even indirectly, physical damage to equipment or people or sabotaging...
- Mean/Tool: an attack performed through the use of technological information systems of space critical infrastructure

# Multi Domain Operation

## ● Interplay with other Domains

- Outer Space enabled ground, ocean, air, and cyber operation
- Other domains enabled outer space operation
- PAROS GGE, Woomera & Milamos Manuel

 Regulatory framework for new technologies on the multi domain operation

# Conclusion & Policy Implication

## ● Turbulence of Global Outer Space Security Governance

- Creation of comprehensive International law: possible or optimistic?
- Segmented international fora for outer space: unilateral or blocs based initiative
- Bilateral & mini multilateral outer space cooperation, cf. comprehensive v. functional

 UN Ch. applies in its entirety?  
Political or legal instruments by UN?

# Thank You!
